

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

RIGHT TO DIVERT AND USE WATER

APPLICATION 30215A

PERMIT 21330

Right Holder: California American Water
P.O. Box 951
Monterey, CA 93942-0951

The State Water Resources Control Board (State Water Board) authorizes the diversion and use of water by the right holder in accordance with the limitations and conditions herein SUBJECT TO PRIOR RIGHTS. As used in this document, right holder means the person(s) or entity authorized to divert water under this permit or license. The priority of this right dates from **January 26, 1993**. This right is issued in accordance with the State Water Board delegation of authority to the Deputy Director for Water Rights (Resolution 2012-0029) and the Deputy Director for Water Rights redelegation of authority dated July 6, 2012.

The Deputy Director for Water Rights finds that the State Water Board and/or the Applicant have met the following requirements for permit issuance: (a) demonstrated the availability of unappropriated water; (b) resolved protests in compliance with Water Code section 1330 et seq. and included appropriate permit conditions; (c) demonstrated that the water will be diverted and used without injury to any lawful user of water; (d) demonstrated that the intended use is beneficial; and (e) demonstrated that the requirements of the California Environmental Quality Act (CEQA) have been met or that the project is exempt from CEQA.

The State Water Board has complied with its independent obligation to consider the effect of the proposed project on public trust resources and to protect those resources where feasible. (*National Audubon Society v. Superior Court* (1983) 33 Cal.3d 419 [189 Cal.Rptr. 346, 658 P.2d 709].)

Right holder is hereby granted a right to divert and use water as follows:

1. Sources of water: **(1) Carmel River and (5-32) Carmel River Subterranean Stream**

Tributary to: **(1), (5-32) Pacific Ocean**

within the County of **Monterey**.

2. Location of points of diversion.

Points of Diversion (By California Coordinate System of 1983-Zone 4)	40-acre subdivision of public land survey or projection thereof	Section (Projected)	Township	Range	Base and Meridian
(1) San Clemente Dam: North 2,053,010 feet and East 5,765,040 feet	NW¼ of SW¼	24	17S	2E	MD
(5) Canada Well: North 2,092,010 feet and East 5,715,190 feet	NE¼ of SW¼	17	16S	1E	MD

(6) San Carlos Well: North 2,091,660 feet and East 5,717,990 feet	NE$\frac{1}{4}$ of SE$\frac{1}{4}$	17	16S	1E	MD
(7) Cypress Well: North 2,087,610 feet and East 5,724,640 feet	SW$\frac{1}{4}$ of NW$\frac{1}{4}$	22	16S	1E	MD
(8) Pearce Well: North 2,087,360 feet and East 5,726,140 feet	SE$\frac{1}{4}$ of NW$\frac{1}{4}$	22	16S	1E	MD
(9) Schulte Well: North 2,087,410 feet and East 5,729,240 feet	SW$\frac{1}{4}$ of NW$\frac{1}{4}$	23	16S	1E	MD
(10) Manor #2 Well: North 2,086,460 feet and East 5,731,340 feet	NE$\frac{1}{4}$ of SW$\frac{1}{4}$	23	16S	1E	MD
(11) Begonia #2 Well: North 2,085,510 feet and East 5,734,740 feet	NW$\frac{1}{4}$ of SW$\frac{1}{4}$	24	16S	1E	MD
(12) Berwick #7 Well: North 2,084,460 feet and East 5,735,290 feet	SW$\frac{1}{4}$ of SW$\frac{1}{4}$	24	16S	1E	MD
(13) Berwick #8 Well: North 2,084,510 feet and East 5,736,090 feet	SE$\frac{1}{4}$ of SW$\frac{1}{4}$	24	16S	1E	MD
(15) Scarlett #8 Well: North 2,084,510 feet and East 5,740,590 feet	SW$\frac{1}{4}$ of SW$\frac{1}{4}$	19	16S	2E	MD
(17) Los Laureles #5 Well: North 2,080,310 feet and East 5,748,590 feet	NW$\frac{1}{4}$ of SE$\frac{1}{4}$	29	16S	2E	MD
(18) Los Laureles #6 Well: North 2,079,510 feet and East 5,749,440 feet	SE$\frac{1}{4}$ of SE$\frac{1}{4}$	29	16S	2E	MD
(19) West Garzas #4 Well: North 2,075,260 feet and East 5,752,190 feet	NE$\frac{1}{4}$ of SW$\frac{1}{4}$	33	16S	2E	MD
(20) Garzas Creek #3: North 2,073,610 feet and East 5,753,040 feet	SW$\frac{1}{4}$ of SE$\frac{1}{4}$	33	16S	2E	MD
(21) Panetta #2 Well: North 2,072,110 feet and East 5,754,740 feet	NW$\frac{1}{4}$ of NW$\frac{1}{4}$	3	17S	2E	MD
(22) Panetta #1 Well: North 2,071,960 feet and East 5,754,640 feet	NW$\frac{1}{4}$ of NW$\frac{1}{4}$	3	17S	2E	MD
(17) Robles #3 Well: North 2,067,110 feet and East 5,759,490 feet	NE$\frac{1}{4}$ of NE$\frac{1}{4}$	10	17S	2E	MD

(24) Russell #4 Well: North 2,061,810 feet and East 5,764,040 feet	SW¼ of SE¼	14	17S	2E	MD
(25) Russell #2 Well: North 2,061,410 feet and East 5,764,040 feet	SE¼ of SE¼	14	17S	2E	MD
(26) A Well: North 2,091,070 feet and East 5,706,020 feet	SE ¼ of SE ¼	13	16S	1W	MD
(27) B Well: North 2,091,970 feet and East 5,709,420 feet	NE ¼ of SW ¼	18	16S	1E	MD
(28) C Well: North 2,087,220 feet and East 5,724,470 feet	SW ¼ of NW ¼	22	16S	1E	MD
(29) D Well: North 2,087,370 feet and East 5,7729,270 feet	SW ¼ of NW ¼	23	16S	1E	MD
(30) E Well: North 2,084,920 feet and East 5,737,320 feet	SW ¼ of SE ¼	24	16S	1E	MD
(31) F Well: North 2,072,120 feet and East 5,754,670 feet	NW ¼ of NW ¼	3	17S	2E	MD
(32) G Well: North 2,070,270 feet and East 5,755,270 feet	SW ¼ of NW ¼	3	17S	2E	MD

3. Purpose of use	4. Place of use					
	40-acre subdivision of public land survey or projection thereof	Section (Projected)*	Township	Range	Base and Meridian	Acres
Municipal	Within the California-American Water Company service area, Carmel River watershed area only.					

The place of use is shown on map dated February 7, 2012 and filed with the State Water Board.

The following acronyms are used in this permit:

Monterey Peninsula Water Management District – MPWMD
National Marine Fisheries Service – NMFS
California Department of Fish and Wildlife – CDFW
California American Water – Cal-Am

- The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed **4.1 cubic feet per second** from December 1 of each year to May 31 of the succeeding year. The maximum annual diversion shall not exceed **1,488 acre-feet** during the authorized diversion season.

(0000005H)

6. Complete application of the water to the authorized use shall be made by December 1, 2022.
(0000009)

7. This permit shall not be construed as conferring upon the permittee right of access to the points of diversion.
(0000022)

8. Cal-Am shall consult with the Division of Water Rights and, within one year from the date of this permit, shall submit to the State Water Board its Urban Water Management Plan as prepared and adopted in conformance with Section 10610, et seq. of the California Water Code, supplemented by any additional information that may be required by the Board.

All cost-effective measures identified in the Urban Water Management Plan and any supplements thereto shall be implemented in accordance with the schedule for implementation found therein.
(0000029A)

9. If it is determined after permit issuance that the as-built conditions of the project are not correctly represented by the map(s) prepared to accompany the application, permittee shall, at its expense, have the subject map(s) updated or replaced with equivalent as-built maps(s). Said revision(s) or new map(s) shall be prepared by a civil engineer or land surveyor registered or licensed in the State of California and shall meet the requirements prescribed in section 715 and sections 717 through 723 of the California Code of Regulations, Title 23. Said revision(s) or map(s) shall be furnished upon request of the Deputy Director for Water Rights.
(0000030)

10. Permittee shall install devices to measure the instantaneous rate and cumulative quantity of water diverted from the Carmel River. All measuring devices shall be properly maintained.
(0060900) (0080900)

11. Permittee shall calibrate and maintain, a continuous flow measurement device, satisfactory to the State Water Board, at Carmel River at Highway 1 Bridge (River Mile 1.1). Permittee may rely on the existing devices maintained by the MPWMD. If the MPWMD elects to cease calibration and maintenance of such device(s), permittee shall cease all diversions pursuant to Application 30215A until permittee installs and calibrates new continuous flow measurement devices satisfactory to the State Water Board. Permittee shall thereafter calibrate and maintain the new devices.

If the measuring device is rendered inoperative for any reason, all diversions under this water right shall cease until such time as the device is restored to service.
(0060062BP) (0000204)

12. Within six months of the issuance of this permit, the permittee shall submit a Compliance Plan for approval by the Deputy Director for Water Rights that will demonstrate compliance with the flow bypass terms specified in this permit. The Compliance Plan shall include the following:

- a. A description of the gages and monitoring devices that will be installed or have been installed to measure stream flow and diversion to underground storage.
- b. A time schedule for installation of these facilities.
- c. A description of the frequency of data collection and the methods for recording diversions, bypass flows and storage levels.
- d. An operation and maintenance plan that will be used to maintain gages and monitoring devices in good condition.

The permittee shall be responsible for all costs associated with developing the Compliance Plan, and installing and maintaining all monitoring facilities described in the Compliance Plan.

The monitoring data shall be maintained by the permittee for ten years from the date of collection and made available to the Deputy Director for Water Rights, upon request. Any non-compliance with the terms of the permit shall be reported by the permittee promptly to the Deputy Director for Water Rights.

(0000070)

13. Permittee shall implement, on all riparian land owned or controlled by permittee, any elements of the Riparian Corridor Management Program outlined in the MPWMD's November 1990 Water Allocation Mitigation Program not implemented by MPWMD until Application 30215A is licensed. Should right holder implement such measures, survey data and analysis of results shall be submitted annually with the electronic report of water diversion to the State Water Board.

Permittee shall maintain in good working order all riparian irrigation systems, on all riparian land owned or controlled by permittee, for use as needed during dry and critically dry water years.

(0490500)

14. For the protection of fisheries, wildlife, and other instream uses in the Carmel River, diversions under this permit shall be subject to maintenance of minimum mean daily instream flows as specified in Table A, Minimum Mean Daily Instream Flow Requirements. No water shall be diverted under this permit if the instream flows would be reduced by such diversion below the minimum mean daily flows specified in Table A. Permittee shall file a report with its annual electronic report of water use to the Division of Water Rights documenting compliance with this condition. The report shall also be filed with CDFW and NMFS and shall contain the following information:

- a. Dates during the previous period of December 1 to May 31 of the succeeding year when water was diverted under this permit; and
- b. Mean daily flows recorded at the Carmel River at Highway 1 Bridge gage.

TABLE A	
MINIMUM MEAN DAILY INSTREAM FLOW REQUIREMENTS	
December 1-April 15	April 16-May 31
<p>Prior to Carmel River lagoon opening to the ocean ¹: May divert with minimum bypass of 40 cfs at the Carmel River at Highway 1 Bridge gage.</p> <p>Following Carmel River lagoon opening to the ocean: May divert with minimum bypass of 120 cfs at the Carmel River at Highway 1 Bridge gage.</p>	<p>May divert with minimum bypass of 80 cfs at the Carmel River at Highway 1 Bridge gage.</p>

¹ On December 1, if water in the lagoon is flowing to the ocean, the lagoon shall be deemed to be open to the ocean. If on December 1 water in the lagoon is not flowing to the ocean, the lagoon shall be deemed to be open to the ocean when the lagoon level drops rapidly from a stable elevation to a lower elevation as evidenced by the water surface elevation gage located at the Carmel Area Wastewater District effluent pipeline across the south arm of the lagoon. This elevation gage is operated by Monterey Peninsula Water Management District.

(0400500)

15. Permittee shall continue to negotiate with CDFW to maintain, insofar as possible, a minimum 5 cubic feet per second bypass flow below San Clemente Dam as measured at the Sleepy Hollow weir.

(0400500)

16. To prevent stranding of spring and fall steelhead juveniles and smolts during critically dry conditions, permittee shall continue to implement or fund implementation of Fisheries Mitigation Measure 3 as outlined in the MPWMD's November 1990 Water Allocation Mitigation Program ("Rescue juveniles downstream of Robles del Rio in summer"). This obligation shall be met during the diversion season only and shall be proportionate to the impact of diversion under this right to fisheries under this right.

(0400500)

17. In the event that further study of the effectiveness of fish rescue operations specified in the prior condition is needed, Permittee shall cooperate with MPWMD in the conduct of any such study. Permittee's cooperation shall include monetary and/or technical assistance, and Permittee's responsibility for assisting in the study shall be limited to the proportionate impact of diversion under this right to fisheries. The need for further study shall be determined as follows: (1) MPWMD may request further study of Cal Am, (2) any request for study shall include the stream reach for study, proposed dates of study, fishery metric to be studied, and cost estimate for the study. The Deputy Director for Water Rights shall make a timely determination regarding the need for further study and specify the timeline for completing the study. The study shall be conducted in accordance with the timeline, and submitted to the Deputy Director upon completion.

(0400500)

18. Permittee shall, in cooperation with MPWMD, implement the Lagoon Mitigation Program outlined in the MPWMD's November 1990 Water Allocation Mitigation Program. This obligation shall be met during the diversion season only and shall be proportionate to the impact of diversion under this right to lagoon maintenance.

(0400500)

19. Permittee shall curtail or cease diversions authorized by this permit when notified by the State Water Board that diversions under this permit are causing the cumulative maximum average daily diversion rate downstream of River Mile 17.6 to exceed 80 cubic feet per second (cfs), as stipulated in Table 9 of NMFS (2002) report. The State Water Board may issue such notification on its own motion, or upon being advised by CDFW, NMFS or MPWMD that the 80 cfs diversion limit has been, or is likely to be, met during a specific time period. Any evaluation of whether the 80 cfs diversion limit has been met shall be based upon the priority of Application 30215A, as compared to other diverters. Diversions may resume, up to the face value of the right, once such diversions no longer result in exceedance of the 80 cfs limit.

(0400500)

20. Cal-Am shall account for water diverted pursuant to Application 30215A in accordance with ordering paragraph 3.(a)(5) for the purposes of Order WR 2009-0060 until Order WR 2009-0060 terminates as provided therein.

(0400500)

21. Within 180 days of permit issuance, Permittee shall submit a compliance plan documenting the measures that it will take to ensure that surface water diversions are through a fish screen satisfactory to the Deputy Director for Water Rights. The compliance plan shall take into account the proposed removal/modification of San Clemente Dam and provide a time schedule for implementation. The fish screen shall be designed and maintained in accordance with the screening criteria of NMFS. Permittee shall provide evidence that demonstrates that the fish screen is in good condition with the annual report and whenever requested by the Division of Water Rights.
(0000213)
22. Any priority obtained for this permit by virtue of condition 10 of Decision 1632 shall be void if the permittee utilizes the water under this permit outside of the Carmel River watershed, as shown on map dated February 7, 2012. Permittee shall submit information with its annual electronic report of water diversion and use documenting that the quantities authorized by this permit were solely used within the mapped area.
(0000021)
23. Should any buried archeological materials be uncovered during project activities, such activities shall cease within 100 feet of the find. Prehistoric archeological indicators include: obsidian and chert flakes and chipped stone tools; bedrock outcrops and boulders with mortar cups; ground stone implements (grinding slabs, mortars and pestles) and locally darkened midden soils containing some of the previously listed items plus fragments of bone and fire affected stones. Historic period site indicators generally include: fragments of glass, ceramic and metal objects; milled and split lumber; and structure and feature remains such as building foundations, privy pits, wells and dumps; and old trails. The Deputy Director for Water Rights shall be notified of the discovery and a professional archeologist shall be retained by the Permittee to evaluate the find and recommend appropriate mitigation measures. Proposed mitigation measures shall be submitted to the Deputy Director for Water Rights for approval. Project-related activities shall not resume within 100 feet of the find until all approved mitigation measures have been completed to the satisfaction of the Deputy Director for Water Rights.
(0000215)

THIS RIGHT IS ALSO SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

- A. Right holder is on notice that: (1) failure to timely commence or complete construction work or beneficial use of water with due diligence, (2) cessation or partial cessation of beneficial use of water, or (3) failure to observe any of the terms or conditions of this right, may be cause for the State Water Board to consider revocation (including partial revocation) of this right. (Cal. Code Regs., tit. 23, § 850.)
(0000016)
- B. Right holder is on notice that when the State Water Board determines that any person is violating, or threatening to violate, any term or condition of a right, the State Water Board may issue an order to that person to cease and desist from that violation. (Wat. Code, § 1831.)
(0000017)
- C. Right holder is not authorized to make any modifications to the location of diversion facilities, place of use or purposes of use, or make other changes to the project that do not conform with the terms and conditions of this right, prior to submitting a change petition and obtaining approval of the State Water Board.
(0000018)
- D. Once the time to develop beneficial use of water ends under this permit, right holder is not authorized to increase diversions prior to submitting a time extension petition and obtaining approval of the State Water Board.
(0000019)
- E. Only the amount of water applied to beneficial use during the authorized diversion season, as determined by the State Water Board, shall be considered when issuing a license. (Wat. Code, § 1610.)
(0000006)
- F. Right holder shall maintain records of the amount of water diverted and used under this right to enable the State Water Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.
(0000015)
- G. Right holder shall promptly submit any reports, data, or other information that may reasonably be required by the State Water Board, including but not limited to documentation of water diversion and use under this right and documentation of compliance with the terms and conditions of this right.
(0000010)
- H. No water shall be diverted under this right unless right holder is operating in accordance with a compliance plan, satisfactory to the Deputy Director for Water Rights. Said compliance plan shall specify how right holder will comply with the terms and conditions of this right. Right holder shall comply with all reporting requirements in accordance with the schedule contained in the compliance plan.
(0000070)
- I. Right holder shall grant, or secure authorization through right holder's right of access to property owned by another party, the staff of the State Water Board, and any other authorized representatives of the State Water Board the following:

1. Entry upon property where water is being diverted, stored or used under a right issued by the State Water Board or where monitoring, samples and/or records must be collected under the conditions of this right;
2. Access to copy any records at reasonable times that are kept under the terms and conditions of a right or other order issued by State Water Board;
3. Access to inspect at reasonable times any project covered by a right issued by the State Water Board, equipment (including monitoring and control equipment), practices, or operations regulated by or required under this right; and,
4. Access to photograph, sample, measure, and monitor at reasonable times for the purpose of ensuring compliance with a right or other order issued by State Water Board, or as otherwise authorized by the Water Code.

(0000011)

- J. This right shall not be construed as conferring right of access to any lands or facilities not owned by right holder.

(0000022)

- K. All rights are issued subject to available flows. Inasmuch as the source contains treated wastewater, imported water from another stream system, or return flow from other projects, there is no guarantee that such supply will continue.

(0000025)

- L. This right does not authorize diversion of water dedicated by other right holders under a senior right for purposes of preserving or enhancing wetlands, habitat, fish and wildlife resources, or recreation in, or on, the water. (Wat. Code, § 1707.) The Division of Water Rights maintains information about these dedications. It is right holders' responsibility to be aware of any dedications that may preclude diversion under this right.

(0000212)

- M. No water shall be diverted or used under this right, and no construction related to such diversion shall commence, unless right holder has obtained and is in compliance with all necessary permits or other approvals required by other agencies. If an amended right is issued, no new facilities shall be utilized, nor shall the amount of water diverted or used increase beyond the maximum amount diverted or used during the previously authorized development schedule, unless right holder has obtained and is in compliance with all necessary requirements, including but not limited to the permits and approvals listed in this term.

Within 90 days of the issuance of this right or any subsequent amendment, right holder shall prepare and submit to the Division of Water Rights a list of, or provide information that shows proof of attempts to solicit information regarding the need for, permits or approvals that may be required for the project. At a minimum, right holder shall provide a list or other information pertaining to whether any of the following permits or approvals are required: (1) lake or streambed alteration agreement with the Department of Fish and Wildlife (Fish & G. Code, § 1600 et seq.); (2) Department of Water Resources, Division of Safety of Dams approval (Wat. Code, § 6002); (3) Regional Water Quality Control Board Waste Discharge Requirements (Wat. Code, § 13260 et seq.); (4) U.S. Army Corps of Engineers Clean Water Act section 404 permit (33 U.S.C. § 1344); and (5) local grading permits.

Right holder shall, within 30 days of issuance of any permits, approvals or waivers, transmit copies to the Division of Water Rights.

(0000203)

- N. Urban water suppliers must comply with the Urban Water Management Planning Act (Wat. Code, § 10610 et seq.). An "urban water supplier" means a supplier, either publicly or privately owned, providing water for municipal purposes either directly or indirectly to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually.

Agricultural water users and suppliers must comply with the Agricultural Water Management Planning Act (Act) (Water Code, § 10800 et seq.). Agricultural water users applying for a permit from the State Water Board are required to develop and implement water conservation plans in accordance with the Act. An "agricultural water supplier" means a supplier, either publicly or privately owned, supplying more than 50,000 acre-feet of water annually for agricultural purposes. An agricultural water supplier includes a supplier or contractor for water, regardless of the basis of right, which distributes or sells for ultimate resale to customers.

(0000029D)

- O. Pursuant to Water Code sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this right, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this right with a view to eliminating waste of water and to meeting the reasonable water requirements of right holder without unreasonable draft on the source. Right holder may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this right and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by right holder in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution, article X, section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

- P. The quantity of water diverted under this right is subject to modification by the State Water Board if, after notice to right holder and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved,

and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

- Q. This right does not authorize any act which results in the taking of a candidate, threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, § 2050 et seq.) or the federal Endangered Species Act (16 U.S.C. § 1531 et seq.). If a "take" will result from any act authorized under this right, right holder shall obtain any required authorization for an incidental take prior to construction or operation of the project. Right holder shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this right.

(0000014)

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RESOURCES CONTROL BOARD
